PROFILE

I build data pipelines and forecasting models, from exploration to production. **Seeking a permanent role in data science or ML engineering.**

EXPERIENCE

Data Scientist Mar. 2024 – Aug. 2025

Rhône Energy Cooperative · Lyon, fixed-term

- Designed an hourly consumption forecasting model: **error cut by 18%** across 12 sites.
- Industrialised training with **Airflow and MLflow**, from notebook to weekly deployment.

Data Engineer Sep. 2022 – Feb. 2024

Atelier Numérique · Grenoble, work-study

- Migrated 40 business tables to a documented and tested **PostgreSQL** warehouse.

PROJECTS

Bike sharing Prophet, FastAPI

Station availability forecasting, served by a public API.

SKILLS

Languages

Python, SQL, Bash

Machine Learning

Scikit-Learn, XGBoost, PyTorch

Data

Airflow, dbt, PostgreSQL, Spark

MLOps

Docker, MLflow, Git, Linux

EDUCATION

MSc in Computer Science

Data science

2022 – 2024

Université Claude Bernard
Lyon 1

LANGUAGES

French

English

Spanish
